

United States Social Security Death Index (SSDI)

This listing contains 811 Hebden Clan names extracted from the SSDI. The data is sorted in ascending order by (1) Surname (2) State (3) Birth Date. The records were begun in 1935 under the US Social Security Act. Citizens registered under this act to claim social security benefits. The SSDI does not have a death record for all US citizens, only those who registered to receive benefits. The absence of a name therefore, does not mean that the person is still alive.
